EVERY

Eye exams don't just check vision—an ophthalmologist can diagnose and treat eye conditions in addition to correcting vision problems.

93 MILLION adults in the U.S. are at high risk for serious vision loss, but only 1/2 visited an eye doctor in the past 12 months.

Sources: Centers for Disease Control and Prevention; American Academy of Ophthalmology

ADULTS UNDER 40

• Get a complete eye exam at least 1x in your 20s and 2x in your 30s.

- Presbyopia, the inability to see objects up close, increases after 40.
- Get a complete exam at age 40 and follow-up exams as recommended.

ADULTS OVER 65

- Adjusting between light levels takes longer which can make driving more difficult, especially at night and in the rain.
- Get a complete eye exam every 1-2 years.
